## I. INTRODUCTION

The accompanying bibliography contains over 300 citations of articles and monographs on the topic of psychological operations, disinformation, propaganda, and active measures. In gathering this material, the scope of those terms was set relatively broadly, with the requirement that every source provide serious, in-depth treatment of one or more region, historical period, theory or methodology. As the overall title of the bibliography, the term "psychological operations" is understood here as any action taken in wartime or in peacetime by a nation or an agency of that nation to advance national policy by influencing the perceptions and attitudes of a diplomatic or military adversary without direct military force. Such actions range from the formation of a national arms reduction position to influencing indigenous populations in counterinsurgency campaigns; actions may occur in an international setting over many months or at the small-unit tactical level of a military campaign. The bibliography attempts to cover the entire range of those possibilities. Also included are several Soviet and Western theoretical works that treat psychological operations in the context of human communications and psychology.

## II. STRUCTURE OF THE BIBLIOGRAPHY

In the main section, nearly all the annotated books and articles were published after 1980; a few items of unique value have earlier imprints. A separate retrospective section lists about 100 of the most relevant sources printed before 1980 and already annotated elsewhere. That category contains mainly monographs. A second retrospective listing contains monographs recognized as seminal, basic texts in the psyop field. The majority of sources are in English, or have been translated into English; but, because of the importance of Soviet and German theory and practice in this topic, the bibliography contains a number of books and articles available only in those languages, with translations of their titles. Those sources can be translated completely or in part if deemed useful.

Within the two annotated sections, material is arranged in two separate listings. The second arranges sources alphabetically by author (or by title, when no author is given). The first arrangement breaks the citations down into six categories: General Treatments, International Psyop, Psyop Case Studies, Soviet Psyop, Theoretical Treatments, and United States Psyop. Sources are placed first in the category to which the largest portion of their material applies; sources covering multiple topics are assigned to additional categories. All sources containing detailed accounts of past psychological operations are listed under "Case Studies." The "International Psyop" heading is used for all operations besides Soviet and United States, and for operations directed by the Soviet Union or the United States at a specific country or area. Listings within the six categories are also alphabetical. The retrospective (nonannotated) sections are arranged alphabetically only.

### III. SEARCH METHODOLOGY

Citations were gathered from computer databases covering monographs, newspapers and journals, both in the Library of Congress and elsewhere, using all possible search terms; from existing bibliographies on the subject; from citations in sources already located; from specialized military data files; and from visual inspection of stacks in pertinent sections of the Library of Congress and the Pentagon Library. A few monographs in English and in Russian are not annotated because hard copy is not yet available in any collection; all available information on them has been provided. The search attempted to provide broad coverage of geographical areas and time periods, while avoiding redundancy. But for coverage of current Soviet and U.S. psyop, the listings include a high percentage of the available material that meets the

Bell, J. Bowyer. "Old Trends and Future Reality." Washington Quarterly, Spring 1985, pp. 25-35.

Describes similarities in most rebel ideological foundations and only slight differences in technical means used to achieve victory. On the left-right ideological spectrum, the fewer the assets and more vulnerable the opponent, the more likely the insurgent will resort to spectacular terror.

Black, A. "Tactical Psychological Operations (PSYOPS)." Canadian Defence Quarterly, summer 1987, pp. 29-30.

Examines the military applications for psychological operations. How psychological activities can be used together with weaponry to broaden the impact of conventional combat methods at the tactical level.

Coyle, R. G. "A System Description of Counterinsurgency Warfare." Policy Sciences, March 1985, pp. 55-78.

Discusses the problems of mathematical or purely descriptive analyses of counterinsurgency, suggesting instead use of diagrammatic system description. Develops a model of influence between government and insurgents, analyzing feedback structures to detect asymmetric mechanisms of victory for both sides.

Duculescu, Victor. "Power and Influence in International Relations."  
Revue roumaine d'Etudes internationales, 1984, pp. 299-308.

Examines power and influence as related concepts, and explains their connection. Identifies the need to define power in new, positive terms related to the capacity for negotiation.

Herzog, Richard J. "Tactics in Military Propaganda Documents: A Content Analysis of Illustrations." Defense Analysis, March 1986, pp. 35-46.

Examines the tactics of propagandists in the United States, USSR, and NATO. Concludes that Soviet documents are designed to persuade rather than to inform, and Soviet propaganda has failed to halt Pershing II deployments, but US

Bair, Arthur H., Jr., et. al. "Unconventional Warfare: A Legitimate Tool of Foreign Policy." Conflict, No. 1, 1983, pp. 59-81.

Discusses how unconventional warfare can be a useful asset to the United States in the future, with its use contributing to policy successes.

Baratto, David J. "Special Forces in the 1980s: A Strategic Reorientation." Military Review, March 1983, pp. 2-14.

The history and missions of the Special Forces, and a look at their future, calling for a complete reorientation toward proactive measures to secure long-term goals.

Black, A. "Tactical Psychological Operations (PSYOP)." Canadian Defence Quarterly, summer 1987, pp. 29-30.

Examines the military applications for psychological operations. How psychological activities can be used together with weaponry to broaden the impact of conventional combat methods at the tactical level.

"Central America and the United States Foreign Policy." Washington Quarterly, fall 1984, pp. 4-58.

Evaluation of United States relations with Central America, seen from several sides in a collection of articles. Current policy, future potential, analogies to Vietnam, countering Soviet influence. Cultural factors at work in these relations.

Collier, Peter, and David Horowitz. "Another 'Low Dishonest Decade' on the Left." Commentary, January 1987, pp. 17-24.

An assessment of radical politics in the 1980s, especially attitudes toward Central America. How the Left appeals to United States international morality to hide support for totalitarian movements, in the post-Viet Nam era.

Cordesman, Anthony M. "Whence the Threat to Peace: The Soviet View of the Threat." Armed Forces Journal International, April 1983, pp. 91-93.

The Soviet publication Whence the Threat to Peace (second edition), as a Soviet view of the balance of power and an answer to Western publications (such as Soviet Military Power) on the subject. Sees the publication as a propaganda effort that shows the Soviet mindset on NATO and seeks to undermine western stability.

"Disinformation." Current News Special Edition, December 9, 1986, pp. 1-43.

A selection of 1986 articles from the American press on recent instances of Soviet and United States disinformation, including United States devices against Ghadaffi, seen from several sides. General assessments of contemporary disinformation and the role of the media.

Recent expansion of United States psyops programs. Developments in data-gathering and analytical systems, especially PAMIS (defined as an automated information and control system for psychological operations). Detailed description of goals and structure of such systems, all from the Soviet point of view.

Filiberti, Edward J. "The Roots of United States Counterinsurgency Doctrine." Military Review, January 1988, pp. 50-61.

Historical background of the doctrine, beginning in the campaign against Aguinaldo in the Philippines, the first anti-guerrilla experience of the United States. A detailed case study of United States policies and errors in that era, and how insurgents were isolated and neutralized--a precursor of present counterinsurgency policy.

Fishel, John T., and Edmund S. Cowan. "Civilian-Military Operations and the War for Moral Legitimacy in Latin America." Military Review, January 1988, pp. 37-49.

How civilian-military operations (CMO) can be used for counterinsurgency in Latin America, to strengthen existing legitimate regimes. Use of economic, social, and political measures in place of military operations, to influence indigenous populations by providing them with what they

actually need, especially with engineering and medical assistance and encouragement of independent local organizations for the same purposes.

Foster, Gregory D. "Public Opinion and the Alliance: A Strategy Framework." Strategic Review, Winter 1987, pp. 52-66.

The challenge to the Atlantic Alliance posed by differences of national goals and outlook among the members. Recommendations for meeting the challenge by coordinated diplomacy aimed at the public in these countries, to build a consensus for continued strength.

Frank, Jerome D. "Psychological Causes of the Nuclear Arms Race." Chemtech, August 1982, pp. 466-469.

A psychiatrist analyzes the mental processes that contribute to the paradoxical and contradictory approach of the United States and Soviet Union to the threat of nuclear arms. Common elements of human psychology that contribute, beyond immediate political considerations. Outlines four main elements in shaping behavior, with recommendations for overcoming the influence of anthropological and psychological human fallibility.

Kelly, Ross S. "United States Special Operations." Defense and Foreign Affairs, September 1984, pp. 26-27.

Evaluation of present United States special forces capabilities, seen as making a post-Vietnam comeback. Listing and description of present forces by branch and function, including psychological operations and civil affairs units. Organizational and support problems, and examples of special operations forces in action.

Kissinger, Henry A. "Nuclear Weapons and the Peace Movement." Washington Quarterly, Summer 1982, pp. 31-39.

The clamor for peace in the West seen as creating a psychological imbalance, because no comparable drive exists on the Soviet side. The danger of unilateral disarmament and great insecurity in the countries bordering the Soviet Union, because of the strength of western public opinion.

Krulak, Victor H. "Strategic Implications of the 'Little War'." Strategic Review, Spring 1985, pp. 31-36.

The "little war" as the most likely form of conflict in the near future. How the United States should prepare itself to fight such a conflict, in a variety of situations.
